**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## ***DETAILED ACTION***

### ***Election/Restrictions***

1. **Claim 6 is canceled and new claim 24** is added. Therefore, **Claims 1-5 and 7-24** are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-5, 7-13 and 20-21** are drawn to a right management system for securely delivering **content to authorized consumer** comprising a content provider, a **consumer system** for requesting content from the content provider, a key distribution center for providing authorization **data to the consumer**, a caching server for forwarding the requested content **to authorized customer system** and finally the **caching server and the consumer system** exchange a plurality of encrypted message to be used in the transferring the requested content.

**The subject matter of the limitation of these claims is about a** system for securely delivering **content to authorized consumer** and classified in class **726/2**.
  - II. **Claims 14-19 and 22-24** a rights management method for securely delivering **content (form the content provider to the caching server) upon request from a caching server, the method comprising: providing the caching server comprising a key distribution server, providing a content provider comprising a key distribution client, the content provider communicatively coupled to the a caching server; providing a key management protocol comprising the steps of, forwarding a ticket challenge message from the caching server to the content provider, the challenge message for initiating key management; responsive thereof, sending a key request message from the content provider to the caching server; responsive thereof, sending a key reply message from the caching server to the content provider; responsive thereof, sending**

Art Unit: 2132

**a security established message from the content provider to the caching server; and responsive thereof, sending a security established message from the content provider to the caching server; and establishing a set of keys for securely delivering content from the content provider to the caching server.**

The subject matter of the limitation of these claims is about **establishing a set of keys for securely delivering content form the content provider to the caching server** and classified in class **380/277**.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is a system of delivering **content to authorized consumer** and **is not about establishing a set of keys for securely delivering content form the content provider to the caching server**, Group II, even though, it has similar preamble as that of Group I, the body of the claim limitation is different than that of Group I, since Group II is about a method **of establishing a set of keys for securely delivering content form the content provider to the caching server. The interaction is between the content provider and the caching server and is silent about delivering content to authorized consumer**. See MPEP 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2132

5. Applicants are advised that the replay to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
